

A thousand rainbows

WOLF&RITA

A thousand rainbows

We were always marvelled and intrigued by rainbows. So we tried to learn all we could about them. Did you know that rainbows are, in fact, circular? Or that no two people see the exact same rainbow? But we could never believe they were a simple whim of the weather. To us, they are magical and whimsical. Can everybody see them? Where do they start? Where do they end? What happens if we chase them? Can we break them? Will they shatter and scatter their colours around the field? Sometimes we wonder if we can build a rainbow. Or walk on a rainbow. One thing we know for sure: rainbows make our imagination roam!
